TINEL-LOCK RING APPLICATION TOOL

American Beauty Tools has always manufactured the power unit and foot-switch in what is commonly referred to as system RH-396X. After years of listening to our customers attempt to source the hand-piece and complete system, we have taken action. We completely reverse engineered the Tinel-lock ring hand-piece portion of the the system. We guarantee that our system will perform to the exact same standards as the original RH-396X. Our **Model 105TLRT** includes the **recovery hand-piece**, the **250 watt power-unit** and **activation foot-switch**. For international customers, the system is available in a high-voltage version. Add to cart and follow the instructions for International Guests to receive a quote.

FEATURES AND BENEFITS

Tinel-Lock adaptors are used to terminate copper, tin or silver plated cable braid to the rear of circular connectors using a shape memory metal ring that shrinks uniformly to secure the braid when heated.

Resistance systems ensure uniform heating throughout the Tinel-lock rings

The Tinel-Lock rings have a thermo-chromic paint dot that changes colour when the correct installation temperature has been reached.

APPLICATIONS

Users of this product have stated that they use it for several jobs which include but are not limited to:

1. Heating for Tinel-lock ring recovery
