# Model: 3138E-130

# 130 WATT HEAVY-DUTY ERGO-IRON

An exacting laser cut followed by a precision brazing operation turns our Heavy-duty soldering iron into an Ergo Iron. Ergo Irons have initial wattages ranges from 60 to 175 Watts with corresponding maximum tip temperatures of 850°F to 1025°F. Soldering all day can be a real challenge. Workers have to deal with the heat, the fumes and the weight of the soldering iron itself. We developed the Ergo iron to make it a little easier by reducing the tension on their hands and wrists. We felt it was the least we could do. The near 90 degree angle in the soldering iron casing allows the user to operate the iron from an ergonomically comfortable position. The irons perform to the same exacting standards as our straight irons and are covered by the same warranty. (Stand Included) Excellent for sheet metal, light electrical, heavy electronic stained glass and other applications.

#### **ACCESSORIES**

The following products can be used as Accessories for Model 3138E-130 featured on this page:

| Model     | <b>Product Name</b>                                        |
|-----------|------------------------------------------------------------|
| 43C       | Chisel Style Soldering Tip                                 |
| 43S       | Screwdriver Style Soldering Tip                            |
| 481       | 'Well-Type' Solder Tip<br>Cleaner                          |
| 485-8C    | Dri-Wick Desoldering Braid in Thumb-Wheel Dispenser        |
| CS-ABKIT  | Soldering Iron Maintenance<br>Kit for 1/4" thru 9/8" Irons |
| CS-ISB-38 | 3/8" Industrial Spiral Brush                               |
| CS-PBF2   | Solder Spool                                               |
| CS-TT2    | Solid Sal Ammoniac Block                                   |
| V3700     | Voltage Controller for<br>Soldering Irons & Pots           |

#### **FEATURES AND BENEFITS**

The **near 90 degree angle** in the soldering iron casing allows the user to operate the iron from an ergonomically comfortable position, reducing tension in the hand and wrist.

**Ni-Chrome Compression Wound Heating Elements** are proven to be the most reliable heating element for maintaining soldering temperature in production environments.

Paragon Iron-Clad Lead-Free Soldering Iron Tips Will consistently outperform and outlast ordinary soldering iron tips many times over. Plug-style tip design provides for superior heat transfer and easy cleaning.

**Hardwood handle** provides superior thermal and electrical insulating properties and durability. **Modular construction** allows for easy replacement of consumable parts allowing for tools to last for generations.

# **APPLICATIONS**

Users of this product have stated that they use it for several jobs which include but are not limited to:

- 1. Soldering stained glass art-work
- 2. Connecting coaxial cable connectors

## **TECHNICAL SPECIFICATIONS**

| Standard Tip Style              | Diamond                     |
|---------------------------------|-----------------------------|
| Wattage                         | 130 watts                   |
| AMP Draw                        | < 2 Amp                     |
| Connection Type                 | NEMA 5-15P                  |
| Maximum Temperature             | 975 °F / 524°C              |
| Stand included?                 | Yes                         |
| Available in a 220-240 VAC?     | Yes, available upon request |
| Tip Diameter                    | .375 in                     |
| Tip Length                      | 4.375 in / 11.11 cm         |
