THE LEAD-FREE SWIMMING POOL

Esico Triton electric solder pots are made in a wide range of models. Whatever the requirements, tinning, stripping, dip soldering etc. these solder pots will do the job efficiently. they are designed and engineered for todays continuous production requirements. The cast iron crucibles are designed for convenience, safety and high volume production. Short run soldering and desoldering of through-hole printed circuit boards. It takes approximately 36 bars of our CS-PBF4 to fill our Swimming Pool Solder pot.

FEATURES AND BENEFITS

Just The Right Size ... This 33 Pound Capacity Solder Pot was developed to meet the needs of higher volume production, wider area pcb solder dipping, or similar applications.

With an approximate capacity of just over 30 pounds of solder, our Model 80T is appropriately nicknamed 'the swimming pool'. We challenge you to find another like it on the market today.

This solder pot can be easily maintained by qualified service personnel. The modular design allows for quick replacement of expired heating elements or Thermostats. The detachable cord-set can be easily replaced as needed.

Ceramic coated crucible is chemically stable and highly resistant to the corrosive nature of soldering with higher tin contents, making this pot perfectly suitable for Lead-Free Soldering.
