# THE SWIMMING POOL

Short run soldering and desoldering of through-hole printed circuit boards. Ceramic coated crucible for protection against corrosion. It takes approximately 36 bars of our CS-PBF4 to fill our Swimming Pool Solder pot.

## TECHNICAL SPECIFICATIONS

| Solder Bath Depth              | Approx. 2" in         |
|--------------------------------|-----------------------|
| Solder Bath Diameter           | 6" x 12" in           |
| Wattage                        | 1000 watts            |
| Net Volume                     | Approx. 80 oz         |
| Maximum Temperature            | 650 °F / 343°C        |
| Product Length                 | 13.5 in / 34.29<br>cm |
| Product Width                  | 7.5 in / 19.05 cm     |
| Package Dimensions<br>(Inches) | 20 x 16 x 16          |
| Package Weight                 | 30 lbs / 13.61 kg     |
| Country of Origin              | US                    |
| <b>RoHS</b> Compliant          | Yes                   |

### **FEATURES AND BENEFITS**

With an approximate capacity of just under 30 pounds of solder, our Model 80T is appropriately nicknamed 'the swimming pool'. We challenge you to find another like it on the market today.

Ceramic coated crucible protects your pot against corrosion when using lead free solders.

#### **REPLACEMENT PARTS**

The following products can be used as replacements for Model 80T featured on this page:

| Model | Product Name                   |
|-------|--------------------------------|
| PC80T | Replacement Solder Pot Cordset |
