

Flux Pen Model: CS-FX1

Product Overview

Flux is a key contributor to most soldering applications. It is a compound that is used to lift tarnish films from a metals surface, keep the surface clean during the soldering process, and aid in the wetting and spreading action of the solder. American Beauty has selected the most appropriate fluxes for the majority of applications for which its kits are intended, using only the highest quality chemicals and solvents.

Features and Benefits

Circuit Board Repair Made Convenient and Easy

Works with Lead-Free or Lead Solders

Excellent Wetting

No Cleaning Necessary

Technical Specifications

Net Volume	0.32 wt. oz. (11.32 ml)
Country of Origin	US
