

Model: CS-TT1

TIP TINNER

Tip Tinner is a mixture of solder powder and thermally stable, oxide-reducing compounds. Tip Tinner provides better cleaning and re-tinning of highly oxidized soldering iron tips than wet sponge or rosin-cored wire. Very effective for cleaning and re-tinning soldering iron tips. Appropriate for soldering tips less than 1/2" in diameter.

TECHNICAL SPECIFICATIONS

Net Volume	1 oz (30 ml)
Country of Origin	US
Harmonization Code:	3810.10.0000
RoHS Compliant	Yes
Safety Data Sheets	Download
Warranty Policy	Details

FEATURES AND BENEFITS

Tip tinner provides fast, efficient cleaning and re-tinning of highly oxidized soldering iron tips safely and efficiently.

Thermally-stable compound is lead-free, ESD, and environmentally safe.

Wipe the oxidized soldering tip at normal soldering temperature into the tip tinner for a few seconds until the bright tinning surrounds the working end of the tip.

Extends life of tip
