PREFILLED MID-CAPACITY SOLDER POT (PB FREE)

American Beauty solder pots are recognized throughout the industry for **superior performance** and **reliable control** of solder temperature. Customer have used phrases such as; bullet proof and glutton for punishment when describing their American Beauty pots. If your need is a pot that will work day after day, month after month, this is the product for you.

Uses include tinning the ends of stranded wire leads, pre-tinning small electrical parts, re-tinning soldering iron tips and dip soldering small circuit boards. Internal dross is moved to lip where it cinders away. Dross skimmers are safer and more efficient than paddles, spoons and sticks that contaminate solder and lower temperature.

It takes between 7 to 8 bars of our CS-PBF3 or CS-PB50-3 to fill our 2-1/2 pound pot...depending upon whether or not you are using the dross skimmer assembly. By purchasing the pre-filled 2-1/2 pound pot, you receive approximately 1-1/2 free bars of solder.

FEATURES AND BENEFITS

Suitable for Lead-Free Operation. Grey Cast iron crucible is chemically stable and highly resistant to the corrosive nature of lead-free solders.

Wide lipped crucible for easy fixture mounting

Designed with cartridge heating elements inserted directly into the crucible, creating a superior method of heat application.

Internal removable dross skimmer increases operator safety and maintains solder purity and temperature.
