

# Model: R12062

## 1,800 WATT POWER UNIT

We have made several improvements to this product (Model R12062) since we purchased the Esico Triton product line in 2022. These changes include higher top end output (over 30% higher wattage on average), more circuitry protection and stronger cabinet.

Oh...and its now Black vs Blue.

*For Higher output Power Units, there are THREE terminal bolts or receptacles.*

*When attaching handpieces or accessories only two of these terminal connectors will be used.*
