

Single Probe Accessory Package Model: SCPROBE

Description

The most common accessory package purchased with the SC250 is the SCPROBE. We aren't sure whether modelers enjoy this handpiece because of the pin-point accuracy or simply because its usage style is similar to a pencil iron. If you are interested in purchasing an SC250 with this additional handpiece, follow this link to our SC250-SPC.

Features and Benefits

Copper-coated carbon electrodes can be easily notched/shaped, allowing the user to customize the handpiece to their specific application.

Technical Specifications
